

# ValueLine RO

If you want...

High Quality Drinking Water, Clear & Clean Ice Cubes,  
Delicious Coffee, Tea & Beverages, and Water for Pets & Plants.

Ice cubes, lemonade,

soups, steamed veggies,

popsicles, baby formula,

pets, plants, aquariums.

## Five Stage Purification Process

**Stage 1 5 Micron Sediment Filter:** Removes dirt, sediments, sand, and other physical particles.

**Stage 2 Carbon Block:** Reduces chemicals such as chlorine, that may be present in your water supply.

**Stage 3 2<sup>ND</sup> Carbon Block:** Further reduces organics, odors, and other chemicals that might be present in your water supply.

**Stage 4 Reverse Osmosis Membrane:** 50 gallon per day membrane removes 93-97% of dissolved mineral salts and other contaminants in the water supply.

**Stage 5 Post Carbon Filter:** A final polishing process that enhances and clarifies your drinking water.

## ValueLine Reverse Osmosis System

*Reverse Osmosis is the most effective and economical way to provide your family with high quality drinking water. Reverse Osmosis is the process by which water molecules are forced by your household water pressure through a semi-permeable membrane. Contaminants are rinsed to the drain while your high quality filtered water is stored in the holding tank.*

Max. Total Dissolved Solids  
Water Temperature Range  
Water Pressure Range  
Allowable pH Range

no more than 2000ppm  
40-85° F  
40-80 psi  
4-11

Maximum Manganese  
Maximum Iron  
Hydrogen Sulfide  
Bacteria

no more than 0.05ppm  
no more than 0.1ppm  
must not be present  
water source must be potable
