Granular Activated Carbon \$15.00 per quart

2 cu ft CR1240C granular activated carbon produced from coconut shell by a high temperature activation process under stringent quality control. It has a large surface area, high mechanical hardness, high pore volume and chemical stability. Volume discounts available.

Features and Benefits

1. High absorption capacity and efficiency
2. Hard and durable
3. Highly developed pore structure

Specifications

US Standard Sieve: 12 X 40

Mesh Size:

Greater than 12	5% maximum
Less than 40	4% maximum

Iodine Number (mg/g)	1100 minimum
Carbon Tetrachloride #	55 minimum
Hardness Number	98 minimum
Moisture (as packed)	5% maximum
Apparent Density (g/cc)	0.50 typical
Total Ash Content	3% maximum

Precision Water Distiller Advantages

- The outer cover is constructed of attractive, bright, annealed, mirror finish stainless steel that is easy to clean.
- A "V" in the bottom of the boiling chamber allows for more complete drainage of sediment.
- A taller boiler to increase purity of steam.
- 3/4" drain for better flushing of impurities and sediment.*
- Constructed of #304 stainless steel.
- Large 5" boiling tank opening for ease of periodic cleaning (1/2" than other distillers).
- Trouble-free float system--No flexible gasket to leak.
- Stainless steel boiling tank float with no rubber gasket to replace
- Solenoid Valve (automatic fill Precision Water Distiller Models) with long-life stainless steel plunger.
- Highly efficient cooling coil--50% better than most distillers.
- Unique refillable charcoal filter (stainless steel canister).
- More durable relays to withstand larger voltage spikes and surges.
- Larger lid knobs for longer life and easier removal.
- More efficient optional auto drain kit.
- Optional pump kit.

*Except Precision Water Distiller Model 8-M or 5-3

*Note: Performance based on optimum conditions including water temperature, ambient temperature, line voltage, boiling tank cleanliness, boiler fill level, etc.

* Specifications are subject to change without notice.
