Water Specialties Inc. is a proud member of the Water Quality Association, with two level VI certified Water Specialists, two of only three in Utah.

The Water Quality Association (WQA) is a not-for-profit international trade association representing the residential, commercial, industrial, and small community water treatment industry. WQA maintains a close dialogue with other organizations representing different aspects of the water treatment industry in order to best serve consumers, government officials, and industry members.

The WQA certification is a voluntary credentialing process. To achieve any WQA-certified title, the candidate must pass a comprehensive exam and accept the WQA Code of Ethics of the Water Quality Improvement Industry. The WQA certification process singles out individuals with a high level of expertise, dedication, and professionalism within the water treatment industry. Professionals maintain their WQA certification status by meeting continuing education requirements.

Please visit www.WQA.org, to find out more about the Water Quality Association and our companies standing with their organization.
