

Precision Pure PWS 12-12 & 12-20

Automatic Family Size Water Distillers

For automatic family size convenience, the Precision Pure 12-12 & 12-20 Distiller's, hands-off, fully automatic operation is designed with the busy customer in mind. This automatic distiller allows you to go about your busy day, with the secure feeling that when you need it 12 or 20 gallons of the purest steam distilled drinking water are available at your fingertips, without the extra work and inconvenience of handling bottles. The outstanding features of this advanced design include: being constructed with high quality, easy to clean, mirror finish stainless steel; a user-friendly, easy to change and long lasting charcoal filter; and a 3/4" impurities drain system. Combine these outstanding features with the optional pump kit and automatic drain, and your busy schedule will just have become easier.
