

## Credentials & Certifications

Water Specialties Inc. is a proud member of the Water Quality Association, with 3 Master Water Specialists, three of only four in Utah.

The Water Quality Association (WQA) is a not-for-profit international trade association representing the residential, commercial, industrial, and small community water treatment industry. WQA maintains a close dialogue with other organizations representing different aspects of the water treatment industry in order to best serve consumers, government officials, and industry members.

WQA certification is a voluntary credentialing process. To achieve any WQA-certified title, the candidate must pass a comprehensive exam and accept the WQA Code of Ethics of the Water Quality Improvement Industry. The WQA certification process singles out individuals with a high level of expertise, dedication, and professionalism within the water treatment industry. Professionals maintain their WQA certification status by meeting continuing education requirements.

WQA is a resource and information source, a voice for the industry, an educator for professionals, a laboratory for product testing, and a communicator to the public.

Please visit [www.WQA.org](http://www.WQA.org), to find out more about the Water Quality Association and our companies standing with their organization.
